**Subject:** Racketeering

Mr. Attorney General of California:

Please do not accept the inadequate settlement being pushed by the Federal government for the Microsoft matter. As a computer-using citizen of this state I urge you to protect your constituents from what is really something like corporate racketeering. How many small tax-paying California companies have been driven under or hobbled by Microsoft's illegal practices? That translates into less revenue for the State and higher taxes for the rest of us.

Stand your ground and demand that they pay the appropriate penalty for the damage have and continue to cause. Please protect us.

Robert Huber
